CARE & MAINTENANCE - Powder Coated

Powder Coated [Print this Page](#)

To provide Powder Coated toilet partitions with the proper care and maintenance, the following instructions must be followed:

All four surfaces should be cleaned with a mild liquid soap only. The finish should then be wiped and dried. In areas containing showers, either self-contained or tiled-in units, the partitions in these rooms must receive ventilation from the outside so that excess humidity can escape.

Under no circumstance should the following agents be used:

- Abrasive powders or scouring pads
- Water closet cleaners
- Ceramic tile cleaners
- Solutions containing more than 1% by volume of ammonia
- Solutions containing acids or lye
- Solutions containing enzymes

A stainless steel cleaner/polish may also be used on the trim shoes. Apply the cleaner/polish to a cloth and then apply to the trim. This will avoid overspray that may get onto the floor or painted partition if the cleaner/polish were to be sprayed directly from the can onto the trim.

If the above instructions are adhered to, our product shall provide years of dependable service. **Accurate Partitions Corp.** shall not accept responsibility for product failure if the above instructions are not followed.
